

THE BLAIRMORE ENTERPRISE

VOL. XIV, NO. 35.

BLAIRMORE, ALBERTA, THURSDAY, AUGUST 30, 1923.

\$2.00 YEARLY

LABOR DAY AT COLEMAN AND BELLEVUE

Coleman and Bellevue will be the centres of attraction on Monday next, Labor Day.

At Coleman a mammoth program of sports will be carried out under the auspices of the Crystal Rink.

The program starts at 9 a.m., when some seven or eight hundred children will lead the procession of citizens to Flumerfelt Park, where the sports will be held. The program will include football, baseball and general field-races, etc. A special feature will be a bucking-horse contest.

Substantial prizes will be awarded for all events.

A grand dance will be held in the Opera House in the evening.

At Bellevue, the annual show under the auspices of the Bellevue and district Horticultural and Industrial Society promises to be bigger and better than ever.

Thousands of exhibits of flowers, vegetables, home cooking, fancy needlework, etc., will be entered, and the array will be well worth witnessing.

An orchestra will be in attendance during the day at the school, several rooms of which will be occupied by the show.

In addition, field sports will be carried out during the day and at night a grand ball in the Oddfellows' hall.

Don't miss either of the above events, and remember that on Monday next all roads lead to Bellevue and Coleman.

CHILD KILLED BY MOTOR CAR

Janet, darling child of Mr. and Mrs. Seth Martin, of West Blairmore, was accidentally run over by an auto on Monday afternoon and died almost instantly.

The little girl, in company with some other tots, had attempted to grasp the rear end of a passing team-truck and missing her hold fell back and was run over by the car, which was travelling slowly quite close behind.

All efforts within the power of the driver were unable to avert the accident.

Janet was slightly over five years of age.

Interment took place yesterday afternoon at the Protestant cemetery. Rev. W. T. Young officiating.

MEETING OF TOWN COUNCIL

The regular meeting of the Town Council of Blairmore on Monday night, was attended by Mayor McLeod, Councillors J. Angus McDonald, Owen Morgan, W. Patterson, J. A. McDonald and Evan Morgan, and Secretary Wright.

The minutes of previous meeting were approved as read and a number of accounts were passed for payment, if found correct.

Councillor J. Angus McDonald questioned why cheque was issued to Contractor Pozzi covering his account for part payment of contract price for erection of Victoria Street bridge. The account was not referred to in minutes of previous meeting and Councillor McDonald claimed the account had not passed the council. The Mayor, however, declared that the voucher had been approved by committees and when cheque came to him for signature he felt empowered to sign same. Councillors J. A. McDonald and others favored the action of the mayor and the payment of the account.

The secretary informed the council that up to June the 30th, half the estimated revenue from water and light for the current year had been collected.

Communication from the Department of Attorney-General was read. Applications for building permits were received from James R. Warner, J. Davis and D. Rees. James Warner plans to erect a brick residence at the corner of Dearborn Street and Fifth Avenue, size 38 x 24 feet. The required permits were granted in all cases.

Councillor McDonald reported having received \$55.20 from the Great West Amusement Co. for electric current served during the previous week.

The mayor informed the Council that he had had conference with Mr. Mackintosh, superintendent of this division of the C.P.R., re cribbing of banks of Lyon Creek. According to the mayor, Mr. Mackintosh promised to bring sufficient rock from the slide to build wall both sides of creek from a point about 100 or 150 feet south of track to the new Victoria Street bridge on the north, the C.P.R. to build the walls south of the track, the town to undertake to build walls north of track to Victoria bridge. Another proposition was that the C.P.R. would independently wall the creek within their right-of-way. The council decided in favor of former proposition and the secretary was instructed to so advise the C.P.R. superintendent, so that the materials may be shipped and the work begin immediately.

Blue prints were submitted to show area damaged through the recent floods. Attached to the blue prints was table of estimates of cost of cribbing along the bank of the Old Man River and Lyon Creek, sufficient to prevent a recurrence of the havoc wrought last spring. According to the estimates the total cost would be in the neighborhood of \$16,000. This would include the Victoria Bridge (already completed), proposed bridge at foot of Sixth Avenue, bridge over Lyon Creek on Main Street south, and cribbing and dredging of sections of Lyon Creek and the main river. On motion, the secretary was instructed to submit the blue prints and estimates to the Winnipeg branch of the Department of Interior with urgent appeal for assistance.

A tender was received from Contractor E. J. Pozzi for proposed sidewalk over Lyon Creek near Victoria bridge. Council decided to look the grounds over with a view to somewhat different plans.

Councillor Owen Morgan informed the council that he would be absent for the greater part of the balance of his term. Council urged upon Mr. Morgan not to resign and granted him a three months leave of absence. In

COAL CREEK WINS

RESCUE COMPETITION

MICHEL, Aug. 27.—The mine rescue competition was staged in Michel on August 25, without a hitch and in perfect weather. There were seven mine rescue teams, six male first aid teams, two ladies aid teams and two junior or Boy Scout teams. The results of the competitions were declared in Michel hall at 7:30 and the prizes were given to successful competitors by W. R. Wilson, president of the Crows' Nest Pass Coal Co.

Mine Rescue results—1, Coal Creek; 2, Michel No. 2 team; 3, Fernie.

Male first aid teams—1, Fernie; 2, Michel No. 1; 3, Bellevue and Lethbridge.

Ladies first aid—1, Coal Creek; 2, Michel.

Boys first aid—1, Fernie; 2, Hillcrest.

Mr. John Shevels, of Bellevue, occupied the pulpit of the Union church on Sunday evening in the absence of Rev. Mr. Young, who was relieving Rev. Peters at Bellevue. Mr. Shevels delivered a forceful address, taking as his subject Verse 27 of Chapter 1 of the First General Epistle of James: "Pure religion and undefiled before God and the Father is this: To visit the fatherless, and widows in their affliction, and to keep himself unspotted from the world."

The keys of the town of Blairmore will this week end be handed over to those taking part in the big golf tournament. That element of humanity will have away here for three full days, and we understand there will be hundreds of them, both male and female. This event means much to Blairmore, and it is up to all to make the visitors welcome.

Miss Lawson, who last term served the absence of Councillor Morgan, as teacher at Blairmore, has accepted Councillor McDonald will act as a position as teacher in an Ontario chairman of the finance committee. school.

ALBERTA COAL IN DEMAND

Reports from Ontario are to the effect that the shipments of Alberta coal being made to that province under the special rate of \$7.50 a ton granted by the C.N.R., are in great demand from many centres, and there is a movement to appeal to the Federal government to take up the matter of getting an extension of time on the special rate. Howard Stutchbury, trade commissioner of Alberta, is now in Ontario supervising the distribution of the special shipment of 6,000 tons.

EXPLANATION DEFERRED

It will be noticed by the general reading public that the matter of the liquor scandal which was aired by J. W. McDonald early in the year has not been explained by Attorney-General Brownlee. Although he promised to make an explanation in the House, such explanation has not been made.

The only conclusion therefore that can be properly drawn is that he is afraid to attempt an explanation of the possible excuse or reason for using our Provincial Police to escort liquor from Coleman to the boundary. This remains unexplained by the Attorney-General. Surely if the Attorney-General has any explanation for it he will make that explanation.

—MacLeod Times.

When Ignorance Was Bliss.

Methuselah ate what he found on his plate. And never as people do now. Did he note the amount of the calorie count?

He ate it because it was chow. He wasn't disturbed, as at dinner he sat.

Destroying a roast or a pie. To think it was lacking in granular fat.

Or a couple of vitaminies shy. He carefully chewed every species of food.

Untroubled by worries or fears. Least his health might be hurt by some fancy dessert.

And he lived over nine hundred years!—Minneapolis Tribune.

WORKING WITH THEIR MOUTHS

There is one class of community which apparently never takes a holiday: and that is the coterie of flimsy blatherers who call themselves "Reds". They are husky and well fed and apparently have ample funds to spend on railway fares. To travel a thousand or fifteen hundred miles to make a speech in some centre where it may do mischief, apparently causes them no financial worry. No sooner was there a prospect of a strike with accompanying violence in far away Cape Breton than a group of Toronto "Reds" was on the train hastening to the scene to help the cause of revolution and breath vengeance against capitalist "oppressors." It must strike ordinary persons that gentry free to travel so much and talk so much, are hardly the helpless victims of the capitalist system that they claim to be.

There is for instance, one William Z. Foster, who was once described as the "Most dangerous Red in America," and is very proud of the title since he invariably sees to it that reporters get it down in their notes. Foster has been floating around Canadian cities urging a revolt against Samuel Gompers, president of the American Federation of Labor, and against trades unions generally. So

far as one can gather from Foster's ravings his chief complaint against trades unions is that they have not abolished work. But Foster's coming to Canada was quite unnecessary even from the standpoint of the "Reds," there were plenty of agitators already to spread his doctrines. This fact was proven on a recent Sunday when Foster was detained in Hamilton and did not turn out at a street meeting he was to have addressed. Three "Comrades" of Canadian vintage, Joseph Knight, William Moriarty and Malcolm Bruce were only too willing to take his place. Bruce is one of the benevolent outsiders who went to Cape Breton to encourage saboteurs, and became practically violent in his protest against other outsiders in uniform being brought in to maintain law and order. Incidentally, as a deputy for Foster he threw light on what his own idea of work is. He was particularly satirical at the expense of Judge Gary, of the U.S. Steel Corporation, because the latter's voice gave out at a recent meeting—a calamity which never happens to a "Red." "This man," he said "who wanted the last ounce of the worker's strength, couldn't himself work for one hour with his mouth." If working with the mouth is the highest of his accomplishments it is quite plain that Bruce and his "Comrades" have Judge Gary and most other leaders of industrial production beaten forty ways. They surely are human broadcasting machines and can well afford to jeer at those who can merely work with their brains or with their hands.

The gentry who work with their mouths are never short of persons to assail. They have just now a typical mark to stride in the person of Hon. Calvin Coolidge, the new president of the United States; and they started work within twenty-four hours of his accession, not only in Canada, but also in the United States. President Coolidge is in bad odor with every known variety of "Reds," Socialists, Communists, Bolsheviks, Anarchists, and the like. Under the broad canopy of their hatred for Coolidge they can only temporarily unite. While Foster's Communist friends at Toronto were denouncing the new President as a "mediocrity" under the impression that they were uttering a terrible invective, the Socialists of Greater New York were giving him three groans. Their invective was also particularly savage.

"He is not merely a conservative, but a reactionary," said Comrade Julius Gerber in tones calculated to freeze the blood of his hearers. The conclusion of the "Reds" generally is that it is impossible under the capitalist system for men of ability to be at the head of government—meaning thereby men who work only with their mouths. The strapping of Coolidge, the mediocrity, the conservative and the reactionary, is due to his having enforced order with a strong arm while Governor of Massachusetts, and his counsels of frugality and work as solutions for the economic problems of the day. It is to be noted also that Premier Mussolini, of Italy, whose record is that of a moderate socialist, is also being strangled because he is enforcing the policy that Italians must work or starve. Mussolini was right so long as he worked only with his mouth, but since he became a convert to the view that other kinds of work are necessary, he too has become a mediocrity.—Saturday Night.

IT NEVER HAPPENED

A married couple had engaged a cook. She was as pretty as a picture, but her cooking was terrible, and one morning the bacon was burned to a crisp. "Dear," said the wife to her husband, "I'm afraid the cook has burned the bacon. You'll have to do with a kiss for your breakfast this morning."

"All right," responded her husband gruffly. "Call her in."—American Legion Weekly.

Mr. E. M. Galois has returned to his home on Marine Drive from St. Paul's hospital.—Vancouver Sun.

COWLEY HAPPENINGS

The Cowley school reopened on Monday.

Mrs. A. McKelvey, of Vancouver, is visiting at the Buchanan ranch.

Miss Jean Cameron is occupied as teacher of Olin school.

Mr. and Mrs. Percy Burles are receiving congratulations on the birth of a son.

Mrs. Poulson has moved into town to give her children the benefit of the Cowley school.

Mrs. Francis Zimmerman, of Tenonnyon district, has come into town to take Grade IX.

Miss Annie Connolly has accepted the position as teacher of English school, near Pincher Creek.

Rev. D. K. Allan, of Coleman, administered the Sacrament of the Lords Supper here on Sunday last.

A very interesting school fair meeting was held here on Monday night. Final arrangements were made for one of the most successful fairs ever held in Cowley. All general entries will be exhibited in Tustian's Hall. The live stock will be exhibited on the sports grounds. Various numbers are on the sports list, including boys and girls' pen; races and men's football, etc. The Women's Institute are preparing a room for the ladies in the Presbyterian church. Lunch will also be served. Twelve schools are competing in this fair. Competent judges will be here for the day. A big dance will be held in the evening.

HOW SAM WON

Sam had left home when quite young, bent upon working his way through college. However, he found it rather difficult to make all ends meet—so regularly would write to his thrifty Scotch father asking for financial aid.

The father wrote to Sam: "I don't want to hear another appeal for help from you."

The next month this letter came: "Dear Dad: This isn't an appeal. I only want to report to you that I have no pants."

A Nebraska paper says: "George Simpson is greatly improved after being kicked by a horse." Probably it's what he had been needing for a long time.

Miss M. T. Davis returned Sunday night from Vancouver, where she had been spending her summer vacation.

Twould seem to us Woman's greatest fears Are that she'll show Her eyes and ears.

The United States has invested in Canada \$2,500,000,000, according to the Bankers' Trust Company, of New York, which has just completed a survey of Canadian industry and the amount of United States capital invested. Of the total sum invested, \$1,200,000,000 is in bonds, and the remainder in farm mortgages, small businesses, industrial enterprises, banking and private loans. It is computed that more than 200 branch factories were opened in Canada by United States concerns in 1919, and a great number in 1920 and 1921, and that late in 1922 the number of these came to 700.

A colic dog is reported have saved the life of an Ontario girl, while accompanying the child to a nearby store. On the way she stopped on the C.P.R. railroad tracks in the path of a westbound train. Realizing the child's peril, the dog threw himself against her with sufficient impact to knock her clear of danger, and was cut to pieces by the train before he could regain safety. The girl's mother or tried to discourage the dog from going when the daughter started for the store, but he went, and was the means of saving the child's life, and died heroically as a result.

It would be worth while for any parent, or anyone interested in the school life of this community, to visit and inspect the school rooms. During the holidays Janitor Warner worked practically day and night cleaning up, rearranging and generally renovating the rooms and the school in general, and we venture to say, that possibly nowhere in Alberta will be found an educational institution more spic and span and better adapted to the health and comfort of pupils than ours. It must be remembered that there is no proviso in the janitor's contract for this special work, and any action of the school board towards a tangible return for Mr. Warner's efforts should meet with approval from the ratepayers of the district. German railway deficits for the past year amounted to 450,000,000 marks.

MODERATION LEAGUE OF ALBERTA INSTRUCTION TO VOTERS

This ballot has been approved by the Alberta Legislature and will be used to decide the liquor issue by means of the single, transferable, preferential vote.

Sample Ballot

(a) PROHIBITION—Meaning thereby a continuation and development of the present liquor legislation; that is, meaning the abolition of the sale of all liquors excepting for strictly medicinal, sacramental, manufacturing and scientific purposes.	
(b) LICENSED SALE OF BEER—Meaning thereby the sale of beer in licensed hotels and other premises as provided in the proposed Temperance Act.	3
(c) GOVERNMENT SALE OF BEER—Meaning thereby the sale of beer by or through government vendors for consumption in private residences under government control and regulation; other liquors to be sold through doctor's prescription for medicinal purposes.	2
(d) GOVERNMENT SALE OF ALL LIQUORS—Meaning thereby the sale of all liquors by or through government vendors, beer to be consumed on licensed premises and in private residences; wines and spirits to be purchased in limited quantities under permit issued by the government, under government control and regulation.	1

Vote 1, 2, 3, from Bottom Up. Do Not Use "X" Voting on this ballot is done by numerals, 1, 2, 3, 4, placed opposite the question on right hand column, in the order of your choice and NOT by marking "X" opposite a definite question.

IF "X" IS MARKED ON THIS BALLOT, THE BALLOT BECOMES INVALID. The ballot contains four alternative questions. A voter may vote for all four if he desires, but must do so by indicating the order of preference, 1, 2, 3, 4. Plumping is permissible. It is desirable that a definite vote be delivered on Government Control, which is the "D" question.

One way or other this referendum should settle the question finally for some years to come, but the vote should be decisive. SEE THAT YOU CAST YOUR VOTE. DO NOT USE "X" unless opposite Propositions "D" and "A" in order to avoid confusion that the policy to be generally adopted should be, to follow this up by generally putting "D" opposite "C" and "B" opposite "D". This is 1, 2, 3, from the bottom up. "D" DECIDE "C" CONSCIENTIOUSLY "B" BEFORE "A" ACTING.

Modernize Your Home

"Southern Alberta's Triumph" Blairmore, Alberta

THE PASS FIFTEEN YEARS AGO

(From The Frank Paper, 1908.)
December 10—The new coal mining company, to be known as the McGillivray Coal & Coke Co., Ltd. composed chiefly of American capital, has been organized to work the coal property near Coleman known as the McVittie property. J. F. Povah, former chief accountant with the International Coal & Coke Co., is to be the general manager and under his direction the work of opening up the property is to begin in a short time. The company is capitalized at \$3,000,000, two and a half million of which is to be issued, and the balance to be retained in the treasury. The property consists of about three thousand acres. The launching of the new company means a great deal to the business interests of Coleman.

The English speaking Socialists will hold a "pipe dance" on Friday night at Bellevue. Pipes will be sold at auction.

The West Canadian Collieries hooked an order this week for coal for the passenger trains of the C.P.R., Bellevue coal having been found superior quality for that purpose.

The Epworth League debating club held a lively session Thursday evening. The Rev. Taylor read a paper on the subject: "Should Christians Dance?" which later formed the subject for debate. The Rev. Taylor's paper consisted chiefly of extracts from speeches of famous churchmen and all made the same criticism of dancing, taking the evils arising from the lower class of dance and using them against respectable gatherings of a purely social nature. Mr. W. H. Chappell, who led the debate for the opposition, held that Christians should attend respectable dances and thereby help to keep up the standard of amusement. The paper for this evening will be "Foreign and Home Missions."

Business at the Frank customs

house shows a steady gain. The value of imports passed during November was \$5,726.98, on which duties were collected to the amount of \$1,327.75.

Sentinel Lodge of Masons, Frank, elected officers at their last regular meeting as follows: T. M. Burnett, W.M.; Dr. D. C. Mackenzie, S.W.; George Pattinson, J.W.; A. C. Beach, treasurer; J. H. Church, secretary.

A runaway accident in the sligh narrowly missed having serious results on Saturday. Mrs. R. D. Malcolm, Mrs. G. E. C. Martin, Mrs. T. B. Martin and Mrs. G. Q. Rockfort were being driven home from Hillcrest when the team became unmanageable and Mrs. Malcolm was thrown out, striking on her head. The other parties stayed in the rig till the runaways were stopped by a pedestrian.

Mr. and Mrs. D. N. Drain left Wednesday for Los Angeles and Old Mexico, where they will spend the winter.

A meeting to organize a hockey league for the towns on this section of the Crow, to be known as the South Alberta League, was held at Macleod on Saturday, when, it was hoped, a league fully representative of Southern Alberta would be formed, but the meeting turned out rather disappointingly, as only four towns were represented, Lethbridge, Macleod, Pincher Creek and Coleman. Coleman is believed to be the strongest club, and its admission to the League was strongly opposed.

December 17—Professor Huston will spend Christmas with friends at Kaslo, B.C.

E. Morino and J. H. Robertson have secured the contract for erecting an addition to the Elk Valley Brewing Co.'s property at Michel.

It is said that the C.P.R. is negotiating with property owners in the

Cowley district, preparatory to the proposed change of the Crow line. Mrs. McLean, sister of Mrs. B. Steeves, left Monday for Stettler to join her husband.

SHOT SHEEP OUT OF SEASON

A young hunter of this district went into the mountains to fish recently and presumably for protection against bears, he took his rifle along. This led to his being over-taxed and he shot a mountain sheep out of season. After the killing his conscience evidently troubled him and he threw the head and skin away. Major Schoof, game guardian, who was patrolling in British Columbia at the time, was quickly made aware of the game law infraction and followed it up, bringing the offender before Magistrate Knight on Monday last. He pleaded guilty and in consideration of so doing was given the minimum fine. Others who felt tempted to shoot big game out of season, or without a license when the season opens, had best take warning, as the next man brought up will not escape with a minimum fine. And breakers of the game laws stand a real good chance of getting caught—Clareholm Review-Advertiser.

FALL AND SPRING STOCK SHOWS

At the recent meeting in Calgary of the Alberta Cattle, Sheep and Swine Breeders' Association, the following dates were decided upon for fall and spring shows: Fall Stock Shows and Sales at Calgary, November 6 to 9; Horse, Cattle and Fat Stock Show, previously held in the fall, will now be held in April; the Alberta Provincial Poultry Show will be held at Calgary from September 11 to 14.

Mr. Emil Sick, of the Lethbridge Brewery Co., was a visitor to The Pass on Sunday last.

COMMUNICATION

To The Editor Blairmore Enterprise, Blairmore, Alberta.
Sir—It has been widely stated that Prohibition should prove beneficial to the general health of the community. During the recent campaign in Manitoba both sides brought up various statements by various doctors to prove their points. Recently, however, one of the most interesting observations on the question was made in the British House of Commons by Lord Dawson—physician to the late King Edward, and naturally, a man of wide learning and experience in his profession.

Lord Dawson stated that he obtained figures from a large London hospital for the last ten years dealing with the two diseases produced by alcohol. He found that in 1900 there were admitted thirty-nine cases of cirrhosis of the liver and in 1920 only seven.

With regard to the alcoholic diseases peculiar to women, in 1900 nineteen cases were admitted as against only one in 1920.

Taking the diseases due to alcohol in the same hospital per thousand in 1900 nineteen cases were admitted as against only one in 1920.

Lord Dawson went on to say that this was a striking testimony to the fact that the use of alcohol was becoming more circumspect and that there was a greater regard for its quality and the time for its consumption.

This satisfactory result is largely due to the educational work carried on by hospital and doctors in the course of their work. No form of prohibition exists in the Old Country, but, by patient work of devoted men and women, people are being gradually taught that the greatest enemies to human health and happiness are lack of fresh air, improper feeding, dirt and drunkenness or even excessive indulgence in any form of pleasure. It seems as though this method, though slow, is likely to prove more sound and more lasting in its results than that which has been and is being tried out on the North American continent where by legislation seeks rather to be driving them in the opposite direction.

A. SAVELL.
Winnipeg, Manitoba.
August 22nd, 1923.

BIBLE GIVEN MODERN TINGE

CHICAGO, Aug. 25.—After three years constant work, Dr. Edgar J. Goodspeed, of the University of Chicago, has completed the first translation of the New Testament by a Christian. He has discarded the form of the King James version, which has endured more than 400 years and has, as he expresses it, "brought the Bible up to date" using the latest discoveries in Greek scholarship and completely modernizing both text and form.

Instead of the old verse arrangement, Dr. Goodspeed has used modern paragraphing, with modern punctuation and quotation marks. Obscure and archaic locutions have been supplanted by current terms understandable by the "man in the street." All the thees and thous have given way to colloquial speech.

All Biblical terms of money value, weight, measure and distances, are replaced by such concrete modern terms as dollars, cents, bushels and miles. In explaining his work, Dr. Goodspeed says:

"I have undertaken to determine what each writer of the New Testament meant to say, and then I have tried to express this in the simplest and most modern vigorous English."

Lightning made a strange incursion into a country house near Trent, in Austria. It came down the chimney of a room in which twelve persons were seated at dinner, struck the table, breaking the crockery, and melting the silver, went out of the open door, and killed a dog and a cat. The diners were unharmed.

ALBERTA MUST WAKE UP TO GET THE TOURISTS

A recent tourist visitor to Lethbridge had the following to say to The Herald representative regarding roads:

Across the divide the government is doing everything it can to attract tourist money and it is succeeding. Its mountain roads are a wonder. There is a perfect mountain station every five or six miles. His duty is to keep the roads in shape, and he does it. Not a hole is allowed to show, ruts are filled in and the tourist feels that he is wanted. But Alberta does not seem to care particularly. The Alberta part of the circle tour from Macleod to Crow's Nest has been a disgrace all summer and what makes tourists wonder is that it should be in that condition when practically all the way from Brocket to Crow's Nest within a few hundred feet of the road is all kinds of the best road making material that could be asked, gravel, shale, rock and all the rest.

The suggestion is made that Alberta next year should decide upon some kind of a road program and do something. Even if only 50 miles of each main section of the main trails were put in shape and kept so by section men it would be a start and show that Alberta really desired to secure tourist traffic. As it is, tourists are as clamorous as hoboes—they always leave their mark at the next camp, telling all about the roads, and what they have written in the Fernie camp registers about the roads through the Crow's Nest this summer has turned back thousands who intended coming through the Pass from the British Columbia side.

NO MORE WINTER, IS PLAN; CHILL BLASTS TO BE CHOKED

OTTAWA, Aug. 25.—Dimitre Joanovici, a Rumanian engineer, has arrived in Ottawa for the purpose of presenting to the minister of marine and fisheries a scheme to modify weather conditions in eastern Canada and keep the St. Lawrence river open for navigation during the winter by building a dam across the straits of Belle Isle.

Joanovici proposes that Newfoundland and Canada should join in the work, which would consist of a dam 15 miles long and three-quarters of a mile wide at the base, which would block the straits of Belle Isle and prevent the ice floes and cold currents from entering the gulf. Inward and outward navigation would be permitted through two locks.

WHO WILL GET RICH?

Some statisticians blessed with the gift of mathematical curiosity, has figured out that only 1 man in 100, starting at the age of 25, with equal ability and opportunity, will be wealthy at the age of 60.

At 35, 6 out of the 100 are wealthy, 1 is wealthy, 10 are well-to-do, 49 live on their earnings and 35 have made no progress.

At 46, 16 are dead, 1 is wealthy, 4 well-to-do, 65 live on their earnings and 16 are no longer self-supporting.

At 56, 20 are dead, 1 is wealthy, 4 well-to-do, 45 live on their earnings, and 30 are no longer self-supporting.

At 66, 30 are dead, 1 is wealthy, 4 well-to-do, 11 live on their earnings and 54 are no longer self-supporting.

Statisticians would perform a more interesting service if they would figure out how many men out of 100 will be, not wealthy, but of real use to the world. Usefulness is not always expressed in terms of money.

Lawyer McQuis—Are we to understand, Ruston, that your wife is a good housekeeper, or on the contrary?

Ruston—Don't see it, boss, she's so much on de contrary dat she ain't no good housekeeper or wuthin' else.

The Nashville Southern Lumberman remarks: "A critic of our church says that they are dominated by a lot of old men." Does he refer to the lay members?

FALLACY OF BUYING BY MAIL

How would you like to journey to the nearest city for a pound of sugar, or a yard of muslin or a spoon of thread, or a smoke? And how would you like to make a trip when you needed a prescription filled in a hurry with death running you? You would make some noise if forced to such an extremity—and then more noise. You would say—and justly so—that a town in which you cannot buy a pound of sugar, or a yard of muslin, or a spoon of thread, or a smoke or even get a prescription filled, is a mighty poor excuse for a town and not worth living in. Yet our merchants can only afford to keep these things for your convenience as long as you buy other things from them. It is not doing this town any good to buy the little things here and then chase off to a city or send to a catalogue house when you want something on which the merchant has a chance to make a dollar. Neither is it doing you any good, for the prosperity of each citizen is dependent to a large extent upon the prosperity of the community as a whole. We are not telling you something you do not know. We are simply refreshing your memory in hopes that the time may come when our people will conclude that a town that is worth living in is worth trading in. That's all—Ex.

According to advice from New York 600 Danes, Norwegians and Swedes, all farmers and most of them with families, arrived on the Frederik VII, sprouts to farms in the Canadian northwest. Some of them, it is said, were in possession of from \$20,000 to \$30,000.

Here and There

A discovery of excellent schists (raw sienna) was recently made near Ellershouse Station on the Dominion Atlantic Railway. The color of the schists is a bright yellow, with a little gritty matter in the main body. The material can be burnt to produce a variety of colors from reddish brown to black. Prospecting is still going on.

Canadian Pacific S.S. "Metagama" will depart from Montreal via Belfast, recently docked at Montreal and Quebec with the record number of 353 cabins and 1,078 berths. This constituted a record only for ships of the size and type of the "Metagama," the Canadian Pacific Express liners often having a far larger list.

Canadian Pacific Railway officials estimate that 61,000 men would be required to harvest the western crops this year. They expect to supply only 3,000 from the prairie provinces and British Columbia and made arrangements to carry over 50,000 from Ontario, Quebec and the east.

United States factories turn out chewing gum to the value of \$41,000,000 annually. The extent to which this product is used in this country can be appreciated when it is known that at the Canadian Pacific station, Montreal, a man is continually employed in removing gum stains from the marble floor.

Despite the fact that the new Basil at St. Anne de Beaupre is still in course of construction, many thousands more have visited the shrine this year than in former years, and at frequent intervals the Canadian Pacific Railway has been called upon to add special equipment to its regular trains to accommodate the pilgrims. The Reimbursement Funders are investigating a large number of cures claimed to be miraculous.

E. L. Richardson, manager of the Calgary Stampede of 1923, held under the patronage of the Prince of Wales and Governor-General Borden, announces that, owing to the enormous success of the last year, the July 1-14 it will be staged annually instead of at intervals of several years. The 1924 Stampede was attended by 127,000 people.

Only once in the history of Canada was the gold production record set in 1922 and that was in 1920, when the Yukon placer reached the peak of their yield. The value is set at \$26,116,000, an increase of \$675,000 over the previous year's figure. In 1920, 1,350,000 ounces of gold were mined and the value was \$27,116,153.

Canada's trade in clothing and textiles in 1922 was valued at \$110,811,000 over the corresponding period of the last year. For June alone, an increase of \$1,700,000 was recorded. The increase in the value of exports in the first six months of the year was approximately \$20,000,000.

Prince of Wales a Canadian Rancher

This photograph of the Prince was taken on his first visit to the Dominion. To the left is seen a picture of his ranch, and above it is an interior view of one of the suites aboard the Empress of France, bottom right.

HIS Royal Highness the Prince of Wales will for a month or so become a simple Canadian rancher. That he will travel incognito on his coming to Canada does not mean that he will travel in disguise but that he will not take part in official functions or make official visits, and when approached with regard to his stay in the Canadian Dominion he has always stated that his time will be fully taken up by the affairs of the E. F. ranch.

The Prince of Wales exhibits a deep and marked interest in the ranch he purchased near Calgary on his memorable tour of the Dominion, and his desire to visit it is but a fresh indication of the importance he attaches to it and the work it is doing. Immediately after purchasing the ranch, and before returning to England, the Prince made arrangements for the shipment of some of the best stock in the British Isles to the Canadian West. Thoroughbred horses came from the Royal stud, short-horns from the King's farm, shropshire sheep from the Duke of Westminster's estate, and hardy Dartmoor ponies from the Devon moors. The latest importation consisted of a thoroughbred stallion and four mares the finest obtainable in the British Isles. "Will Somers," which heads the stud at the E. F. ranch is a handsome five year old which at three years was the winner of several English classics.

Thus the Prince has demonstrated that his purchase of the ranch was not a matter of sentiment or commercial profit, but a genuine desire to foster the breeding of better livestock in the West. His efforts have been eminently successful. At all provincial exhibitions the animals from the High river ranch are attractive features, and last fall, shorthorn cattle, constituting the first commercial sales the ranch has effected, commanded top prices.

Cattle from the E. F. exhibited at the stock show at the Calgary Stampede were heavy prize winners, and sheep and horses from the same ranch created an unparalleled standard. The Royal ranch has planned to arrive at Quebec on September 12th on the Canadian Pacific steamship "Empress of France". The patrol liner, 16,000 tons, which was the flag-ship of the 10th Cruiser Squadron on Northern patrol duty during the War is the most up-to-date vessel of its type and is most suited to the accommodation of its distinguished passenger. Reconditioned after the war, this ship is one of the most magnificent yet comfortable vessels in trans-Atlantic service. It holds the record for oil, its large and comfortable suites and cabins, spacious promenade decks, numerous and excellently appointed public rooms and service facilities make the Empress one of the most popular ships in the Canadian Pacific fleet.

Agricultural Opportunities Of Western Canada Are In Sound Position As Ever

(By G. H. Hutton, Supt. Agriculture and Animal Industry, Canadian Pacific Railway, Calgary, Alberta.)

Considerable pessimism appears to exist in some quarters as to the future of agriculture and as to business prospects in general in the west.

Extreme pessimism is a disease, and a review of the opportunities afforded in agriculture in the west may serve as a needed tonic to farmers and to business men alike. To the farmer who may feel dejected, in that a review of the situation must provide many illustrations of those who have been depressed and weighed down by circumstances alien to those which face him, yet who have won through; to the business man, a study of the present situation must prove of value in again indicating how wonderful are the possibilities of the west in agriculture, and how closely related is success in that department of our national endeavor with success in business.

I should like to consider the subject of agricultural opportunities, having in mind that has been accomplished and considering also what may be done to multiply the number of successful farmers. First let us set out a correct standard or definition of success. The standard of success which was held up by the incoming settler for years was that the west offered the opportunity to accumulate wealth quickly and to retire after a few years to spend the balance of life in some other business or in idleness.

I submit that the man on the farm may be considered a success who, during the course of his active life, is in a position to enjoy home comforts, has time to devote to the duties of citizenship, time for reading, money to educate his children, is able to lay aside a competence for old age, and not leave his farm for the next generation in as good condition as he found it. I realize that many of those who have not succeeded on farms in the west have failed through no serious fault of their own, but through being over-ambitious, or, in many cases, through having responded during war years to the appeal for greater production. The farmer who extended his operations rapidly during these years and who made investments in livestock and equipment has been faced by such rapid depreciation in values as to test his financial strength to the limit and even beyond.

I do not overlook the fact that a readjustment of the prices of farm products upward to a point in correspondence with the costs of production is necessary, or a reduction of such costs of production to a point corresponding with the values of the products of the farm. Prices of farm products must go up or costs must go down. It is not a matter of vital importance whether the products of the farm be high or low in price if they correspond in value with the things which the farmer has to buy.

There has been some improvement toward correlating these values, but that movement has not proceeded as far or as rapidly as it should. I wish to point out, however, that even during the latest few years when the spread between the value of farm products and the value of the things the farmer buys has been greatest, even during the years when the need for readjustment has been greatest, we have a considerable percentage of farmers in Western Canada who have been making good. The man who has been operating a farm within his own capacity to handle, largely in so far as labor is concerned, and who did not expand his purchases during the period of high prices for land and livestock beyond his ability to pay cash in a sound financial position today.

I feel sure that everyone who has studied the situation will agree that the west is economically sound, and that a great future lies ahead.

In conclusion, let me say that I believe that the fertility of our soil, the invigorating climate which we enjoy and the energy of our people will enable us to produce high quality products in competition with any nation in the world.

The opportunity lies at our door for reducing the costs of production of our products, the improvement of the quality of these products and the enlargement of our markets in consequence of improved quality. If we take advantage of these opportunities the result will be increased prosperity in every branch of agriculture and in every department of our business activity.

Our vision, without moving the eyes, covers an arc of about 220 degrees.

Pleasures attained without labor are of short duration.

G. H. H. 1888

"Aerovel" New Invention

French Scientist Claims No Trouble For People to Fly

A French scientist points out that we shall never be able to fly until we can move through the air on our own power, as does a bird. Gliders, also, he says, are no good, as one can only make them go long distances in warm climates, where currents of air, passing upwards, make it possible. What we should do is to fly as a bird does. A bird flies by flapping its wings and, if we wish to fly, he says, we also must have wings to flap.

So he has made a little model of what he calls an aerovel, and he thinks that with such an apparatus a man ought to be able to fly through the air just as a bird swims in the water. The aerovel consists of a pair of wings, a tail piece and a steering gear in the front. Getting under the apparatus, a man works the wings with his arms; his legs work the tail, which makes the machine go up or down, and the head moves the steering gear in front, which decides which way to go.

To fly with such an apparatus, says the inventor, will not be any more tiresome than swimming. You are not suspended from your apparatus, but resting on it. The gliders do most of the wing work and besides, he says, you do not need to flap the wings very much or often, as you use the glides a good deal, just as with gliders. Besides, he has put in a little motor for use in case of the pilot becoming tired. It is only a small engine, 2 or 3 h.p., and he hopes soon to make his model so perfect that it will be able to do without it altogether.

If this new apparatus is made in quantities, it will cost about as much as a bicycle; so that it would be quite possible for most people to buy one.

On the average every man, woman and child in Great Britain pays a little more than \$100 a year in taxation.

Few wrecks on the matrimonial seas are caused by squalls. Many are the result of sailing in a fog.

Six U.S. Presidents Have Died in Office

Two Served Only Short Term, Three Were Assassinated

Five presidents of the United States besides Harding-Harrison, Taylor, Lincoln, Garfield and McKinley—died before finishing their term.

William Henry Harrison, a Whig, died one month after his inauguration in 1841, and was succeeded by John Taylor, Democrat, who served out the remainder of the term.

General Zachary Taylor, elected as a Whig in 1848, died in 1850, after serving one year, four months and five days. Vice-President Millard Fillmore, also a Whig, served out the term.

Abraham Lincoln, the first Republican President, after serving a full term from 1861 to 1865, was assassinated by James Wilkes Booth in Ford's Theatre, Washington, on April 14, 1865, one month and 11 days after beginning his second term. He was succeeded by Vice-President Andrew Jackson, Republican, who served out the term.

James A. Garfield, Republican, was assassinated by Charles J. Guiteau in the Baltimore & Ohio railroad station on September 19, 1881, six and one-half months after beginning his term. Vice-President Chester A. Arthur, Republican, succeeded him.

William McKinley, Republican, after serving nearly a full term, was shot at Buffalo by Louis C. Gage on September 6, 1901, and died on September 14. He was succeeded by Vice-President Theodore Roosevelt, who was elected in 1904 to succeed himself.

To Experiment With Oxygen Apparatus

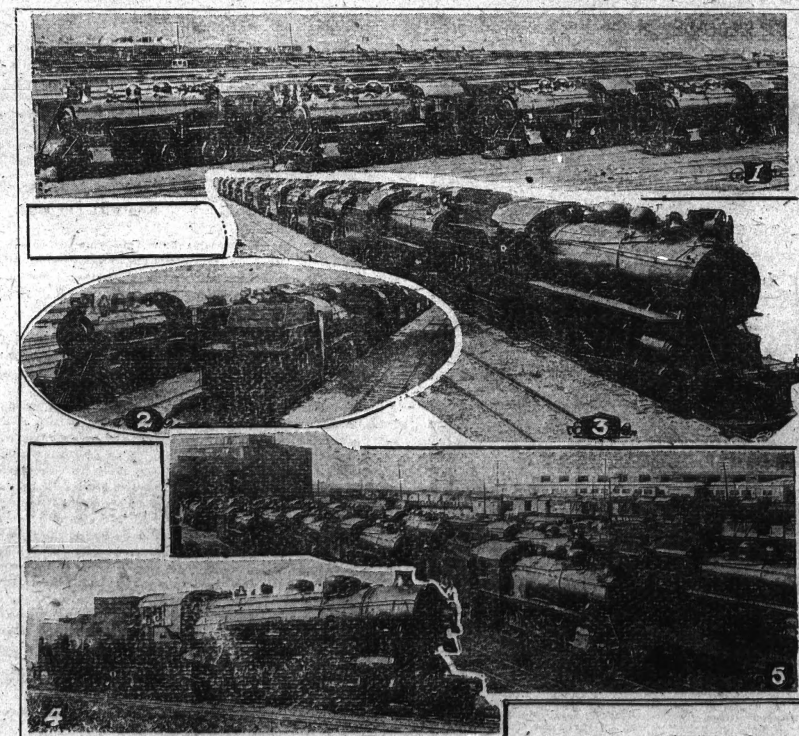

Another Attempt Will Be Made to Scale Mt. Everest

Brig-Gen. C. Bruce, leader of last year's British expedition for the conquest of Mount Everest, left Champer, accompanied by Henry Fairbanks, manager of Torre Haute, Ind., to experiment in the ascent of the highest peaks of the Alps in Valais Canton, with a new oxygen apparatus which will be employed in another attempt to reach the top of Mount Everest next year.

Professor Huxley: "What do you know of the age of Elizabeth, Mr. Jones?"

Jones, dreamily: "She will be nineteen next week."

ASSEMBLING NEW EQUIPMENT TO CARRY 1923 CROP

Here are some of the engines and box cars, Canadian made for Canadian traffic, which arrived in Winnipeg this week to augment the rolling stock of the Canadian Pacific Railway. This equipment is now in readiness for the transporting of Western Canada's crop, which this fall is to be one of the largest ever recorded. These additional engines and cars were constructed at the company's shops at Angus, near Montreal, and have been assembled at the Western shops, Winnipeg, awaiting the call to the harvest fields of the west.

The upper picture shows four trains leaving Weston with a string of approximately 100 box cars per engine. Each car has a capacity of 60 tons. (2) and (3) some of the new freight engines which will be used to haul the grain throughout the three prairie provinces. (4) One of the 55 new P-2 class engines. These engines have a total weight of 252 tons, exerting a traction effort of 55,000 pounds. Their driving wheels are 6 ft. 5 inches in diameter, cylinders 26 1/2 in. diameter by 36 in. stroke, the total length being 81 feet 4 1/2 inches. The tender has a water capacity of 4,000 gallons and 14 tons of coal, which is equal to the average citizen's winter supply of fuel. These engines are known as the P-2 class, numbered in 5,200 series. They have vestibule cabs for the comfort of the engine crew and are electrically equipped throughout. The complete weight of one train hauled by one of these engines including the engine is 4,478 tons, of which 3,000 tons would be the carrying capacity of wheat, or 100,000 bushels in each train. The carrying capacity of the 45 engines of this standard is 4,522,700 bushels per trip. Each engine makes one trip a day. Picture No. 5 shows a group of the new locomotives. Their capacity and weight rank them among the biggest of their type in the world.

Tourists Buy Farm Lands

One American Purchased Four Farms For Himself and Sons

Tourists who have visited the province, recently from United States, registering at the Calgary Auto Camp, have purchased lands in Alberta and engaged in farming here. Twelve of these tourists in the past month have arranged to purchase farms in this province, and one of them has purchased four farms for himself and his sons. Over 4,600 tourists have registered at the Calgary Auto Camp, a large number of them having traveled over the new Banff-Windermere highway. They are all delighted with the scenery provided in the Canadian Rockies.

Stock Slaughtering and Sales

This Year Shows Decrease in Calves and Sheep

In inspected slaughterings this year, the Dominion Livestock Branch reports a decrease in both calves and sheep compared with last year, the totals being 137,359 calves compared with 172,721, and 37,792 sheep compared with 101,127. Cattle slaughtering shows an increase of 23,594 and hogs of 152,359, the totals being 275,609 cattle to 199,565, and 1,692,544 hogs to 940,285.

Sales at public stockyards during the first six months of this year show an increase of about 50,000 cattle and approximately of 100,000 hogs, compared with last year. Calves showed a decrease of over 11,000 and sheep and lambs of 12,000.

"Candidate" Meant White

"Candidate" is, originally, a Latin word which means "white." With the ancient Romans, at election time, those who were running for office wore a " toga candida," a white mantle, emblem of the purity of their political intentions. A herald announced to the voters gathered in the forum: "cui res agitur" (your interests are to be attended to); and then the tribes took each candidate by the hand and led him around, presenting him to the crowd.

Business of Cordage Co. Growing

The Canada Western Cordage Company, of New Westminster, started in 1920, has developed into a most thriving industry. Last month was the biggest month in the history of the company, 225,000 pounds of rope having been shipped. The production was four times that of the corresponding month last year.

Great Britain Chooses Wonderful Harbor For Building Naval Base

The recent announcement of the First Lord of the Admiralty that the Imperial Government has decided to build a naval base on the island of Singapore has directed public attention toward that wonderful harbor, where miles of smooth water, protected by islands, lead up to the sheltered roadstead in which countless ships can be untroubled by the storms and squalls which vex the tropical seas.

Round the harbor, writes the Singapore correspondent of the Times, chosen deliberately by the genius of Stamford Raffles a hundred years ago, there has grown up a great and fascinating city. It is the greatest trading centre of Middle Asia, and to it come innumerable native junks and sampans, bringing the tin and rubber of Malaya and all the varied produce of the archipelago. There come also the larger ships down from the China seas, with the silk, fruit, pottery and rice of the Middle Kingdom, manufactured goods of Japan, and the vessels bringing meat and wool from Australia. This traffic has justified the wisdom of Stamford Raffles in insisting that Singapore should be a free port.

It is a wonderful sight to see the steamers surrounded by lighters and sampans crowded together a few hundred yards from the big wharves and great banking houses, and the ceaseless traffic to and from loading and unloading freight. One feels, as at every step one takes in Singapore the curious combination of East and West. Here human labor is abundant, the overflow of overcrowded China. Boatmen, half naked, with their wide basket hats, stand urging forward with absurdly long oars their craft on the bows of which are painted large eyes that they may see their way. The heavy labor of these boats of coolies goes on alongside the most modern marine machinery, just as the rickshaws and bullock carts share the crowded streets with Ford cars and the latest Rolls-Royce.

In the evening when the great heat is over one can watch the scene from the edge of the Padang, the great grass space running from the Cathedral and the main hotels to the edge of the sea wall. Behind one is a dense forest of Asiatics, and a small

but dominant proportion of white clad Europeans may be watching an exciting football match. The teams may be Europeans, Malay, Chinese, Burman or mixed, and may speak any language from Portuguese to Tamil. The final of the Association Football League of the Singapore volunteers was played here between the Chinese and Burman volunteer companies teams, just won by the former after an exciting match, enthusiastically and critically followed by a great crowd of all peoples and languages, all imbued with a thoroughly sporting spirit.

But one can certainly have met in Singapore, and the intense interest of the place lies in watching the working out of this result. Roughly speaking, two-thirds of the population of half a million is Chinese, half of the remaining third one-half is Malay and the other comprises a large proportion of Tamil and other Southern Indian peoples, the European community, some five thousand, and all the Arab, Armenian, Japanese and other Asiatics, and the Shikhs police. Immigrants still pour in, and solid blocks of China are produced over large quarters of the city and in the picturesque little villages which spring up like mushrooms wherever the gardener can find a little stream.

From the oldest and most beautiful of the Chinese temples, where one must buy the needed crackers charged with gunpowder and hurl them to explode on the pavement and exorcise the devils before entering, you can walk a few hundred yards to the polo ground and hear about the chances of the club team in an approaching match in the Federated Malay States. The sacred cobra from the Buddhist temples still occasionally escape and are captured in unthoughtful hands. So it goes on. One is surrounded by unknown and by familiar worlds; yet they do meet and the unifying influences of education, trade and love of sport tend to draw them together.

How will it all end? Perhaps the solution may lie in realizing how this astonishing "community" has grown up. It owes its very existence to its geographical position. Its trade is seaborne, its huge markets are fed from the sea, and, like some of the great cosmopolitan cities of old, its interests lie in trade, in peace and in making money.

Here we are all immigrants together. A hundred years ago the island was practically uninhabited. No one has the sense of oppressed nationality, so a new Malayan nationality may grow up, as an American one has grown up in the United States, binding all the immigrants together and molded by the highest tradition of the Commonwealth of British nations, of which it should be no mean part. When one watches the football matches one feels very hopeful about it!

Suggests a Limit On Air Armament

British Expert Says Question Should Be Considered Seriously

Major-General Sir Frederick Maurice, who was Chief of Military Operations for Great Britain during the war, declares in an article on the increase in the air forces of France and Britain that it is high time the question of limitation of armaments to be taken up seriously. He says that the British Government's recent decision to nearly double England's present air equipment meant a return to competition in armaments and that such competition is not likely to lead to improved relations between the two countries.

General Maurice emphasizes Great Britain's willingness to enter into a conference on the reduction of air armaments similar to the Washington conference on naval armaments. But for the present, he says, Britain must, out of self-protection, bring her air strength up to that of France. "France," says he, "is the only country which within the next ten years is likely to be able to consider serious attack upon England from the air. Today we are not in the most remote danger of invasion which comes by sea. Therefore, for the first time for centuries, the navy has ceased to be our first line of home defense, and that role has devolved upon the air-force."

Japan Retiring Many Officers

Japan has retired 850 officers, including seven general officers, August, 1922. The Japanese Government has announced that it will shortly discharge from the service 1,371 additional officers, including four generals, seventeen lieutenant-generals and thirty-three colonels. Many of the retired officers have been the recipients of Economics of the Imperial University to qualify for civilian occupations.

Blairmore Lodge, No. 68, meets every Tuesday night at 8 p.m., in the Oddfellows' hall. Officers for the ensuing term: N.G.—M. B. Hoffman; V.G.—J. S. Dawson; Rec. Sec.—E. McEwen; Fin. Sec.—H. James; Treas.—J. Montalbetti.

Crow's Nest Encampment, No. 8, meets on the second and fourth Wednesdays of the month in the I.O.O.F. hall at 8 p.m. Officers for ensuing term: W. Patterson, C.P.; James Crowder, S.W.; E. Oliver, R.S. and F.S.; Joe Montalbetti, Treas.

Crowfoot Rebekah Lodge, No. 66, meets the first and third Thursdays of the month at 8 p.m. Officers: Sister Evans, N.G.; Sister Joyce, V.G.; Sister James, R.S.; Sister Hood, F.S.; Sister N. Evans, Treas.

Bellevue Lodge, No. 118, meets every Monday night at 8 p.m. Officers: H. Peters, N.G.; F. Beale, V.G.; W. Goodwin, Sec. Treas.

Armenian Encampment, No. 17, Bellevue, meets the first and third Wednesdays of the month. Officers: A. B. Carr, C.P.; Stephen Berry, H. F. Harry, Sec. S.W.; Fred Padgett, J.W.; E. Excellin, treasurer; Charles W. Ray, Scribe, Box 6.

Visitors of the Order are cordially invited to attend the above lodges.

FROM THE TOURIST'S LOG

(Blairmore Campsite)

August 4—To Tourists: Be sure and drive slow over Frank Slide. Bad turns in the road and road awful rough. Crows' Nest roads are the worst in the country.—Kitcherbellakin.

Albertans: How for government control of trunk roads. Municipal control is a rotten system, and the tourist traffic is as good as a waste-time crop of wheat. To Blairmore: Spend less for booze and more for one road tourist can use. Put an end in your summer kitchen. We're not beefing—just rainy-night suggestions. You have a dandy town, fine location and great possibilities as a tourist stopping place. Don't overlook these bets.—Calgarian.

August 6—Blairmorianites: Rested in your camp. Find it best in country—a piece of God's wonderful work. Would advise people here before us, who have not been satisfied, to stop beefing. Yours—Thrice Naughty Three.

For a new one, your camp and equipment are very good and much appreciated by us, us and kids. Suggested improvements: Separate toilets, some sort of screen for open end of kitchen to prevent your bobbed-hair mimics from rubbering. Re roads: Our Farmer Government may be hell on wheat boards, wheat pools, etc., but judging by condition of the roads from the B.C. boundary to Blairmore, they know D little about road making. Road from Crows' Nest to Cranbrook A-I. Could our bunch at Edmonton not borrow some of the B.C. road men for a course of practical instruction for the so-called road makers here.—Edmontonian.

August 9—If booze is the means of creating revenue to build the good roads in B.C., then, Alberta, to God's sake go WET and get some revenue for the government, instead of letting the bootlegger get it.—Calgarian.

Arrived here for lunch. Very excellent camp, except, would suggest separate toilets.—Saskatoonian.

Arrived here August 9th. Camp very good for a new one. Hope it is still better the next time we pass through here.—Calgarian.

August 10—Camp good. Roads rotten. Hoping for better roads—Calgary.

Had a fine trip, so far, but found the roads in Idaho a disgrace to the State. B.C. has fine roads and fine people. There is a nice camp at Waterville, Wn.; not the best, but it is in good shape and good accommodation.—B. M. E.

From Granite Falls, Washington—We Yankees love Canada, but the time limit is too short for tourists. We can't spend money enough in thirty days, why not give us 60 to 90 days? Your camp is good. Thanks for the same.—J. L.

This is the second best camp since we left Seattle, Wash. Good accommodation, but anyone wanting a real good camp ground should go to Wilbur. It's fine everything for good accommodation.—Four.

Camp is just dandy and the accommodation splendid. We are out just for a regular camping trip and found a dandy road until just before we got to Creston. We came around a corner upon a hill and the brakes would not hold and we ran into the bank. The car took a complete turn and, as the top was up, none of us got hurt badly, but all shaken up.—Staveleyite.

We understand that at a special meeting of the Crows' Nest Pass Bootleggers Association last night, that body of financiers decided to establish a bank of their own.

London Humorist—According to statistics nearly 5000 English authors lectured in the United States last winter. And then people say that America has done nothing to relieve the distress of Europe.

Hard coal seams have been discovered near Canmore.

Inspector Hutchinson is succeeded in this inspectorate by Inspector Morgan.

We understand that Mr. Owen Morgan will leave shortly to take charge of the coal mine at Saunders Creek.

The minister of finance has approved the merge of the Bank of Hamilton with the Canadian Bank of Commerce.

Fernie, champions of the East Kootenay Baseball League, will play a picked team at Lethbridge on Monday next.

Two, foot-hill-grown steers were slaughtered here by P. Burns & Co. this week, one tipping the scales dressed at 900 pounds, the other at about 980.

Hillcrest football team defeated Fernie on Saturday evening last by a score of 2 to 1. An excellent game was played and was witnessed by a record crowd of rooters.

Roy A. Hayes, United States prohibition commissioner, says that a bribe of \$300,000 weekly was offered to enforcement officials by a group of brewers and bootleggers. Nothing like that happens in this country—No sir! (? ? ?) and then some.

About a dozen members of the local tennis club journeyed to Hillcrest on Saturday afternoon, where despite the showers of rain, a splendid time was had in several friendly matches. The ladies of the Hillcrest club served a delightful tea for the visitors.

We understand that Fred Carmello's Musical Comedy Company have decided on a return to this district and will appear at Hillcrest opera house on the night of Wednesday, Sept. 12, and at the Grand Theatre, Coleman, on Thursday, Sept. 13th, in a new play entitled "Up In The Air."

Captain—What are you scratching your head for, Rufus?

Colored Private—Aw, sub, I got arithmetic bugs in my head.

Captain—What are arithmetic bugs?

Colored Private—Dat's ecotied.

Captain—Why do you call them arithmetic bugs?

Colored Private—Because dey add to misery, dey subtract from my pleasure, divide my attention and dey multiply like the dickens.

There is a subject, which we would like to speak of, but our modesty forbids, but if you are in arrears with your subscription, you will see him; we mean. So we are sure we shall not have to speak to YOU—Ex.

Harry K. Thaw, the slayer of Sanford White, has been granted leave of absence from a state asylum to spend a few months with his mother.

Mitchell Davis, of Franklin Parish, La., was recently convicted of murder because Peter, a bloodhound, followed a trail to Davis' home from the scene of a murder. An appeal to the state supreme court resulted in a reversal of the verdict, the chief justice ruling that to admit bloodhound testimony was as barbarous as witchcraft and that no man should ever be hanged on the testimony of a dog.

We understand that all the pupils in mining, taught during the night school season by Mr. Owen Morgan, have passed successfully in examination.

William R. Lees, one of the founders of Pincher Creek, died in that district on August the 22nd, at the age of 72 years. He was a native of Fallworth, Ontario, and came to Macleod in 1882, having travelled from Fort Benton, making the trip in one month. For a number of years he was employed by the late Senator Peter McLaren, of the McLaren Lumber Co. At the time of his death he was a member of the Pincher Creek school board.

Chestnut Charlie says—"Chickens in the car have wrecked a lot more autos than chickens in the road."

Blairmore's tax rate for the year 1924 was set at four mills on the dollar. At that time Mr. T. Ede was an advocate of higher taxes and Capt. W. A. Beebe drew down the big salary of fifty dollars a year for his services as overseer and general secretary-treasurer. In that same year Joseph Little erected "a handsome cottage" for himself on the north side of the river.

Two negroes were lying behind a packing case on the docks at Brest taking the labor out of the alleged labor battalion. Said one boastfully: "Boy, Ah comes fum a tough breed. My ole man done cut his nails wif a ax an' brush his teeth wif a file." "Huh, ain't so tough. Mah ole man am a plumber, an' twice a week he done shave hisself wif a blow torch."—Legion Weekly.

Blairmore, Alberta

A popular rector tells a good story against himself. Going up the steps of his church to conduct the service, he was accosted by a lately old lady in difficulties with her breathing. "Pardon me," she said, "but would you do me the favor of assisting me up the steps?" "Certainly, madam," asserted the rector, giving her his arm. They reached the door and then the old lady, pausing for a moment's rest, said: "Pardon me once more; but do you happen to know who is preaching this morning?" "The rector, madam," replied the cleric. "Oh," she said. "Then might I beg you to yet another favor?" "Certainly," replied the rector once more. "What else can I do for you?" "Would you," said the old lady, "be so kind as to assist me down the steps?"

It happened in a Southern Alberta town less than two hundred miles from Blairmore that an A.P.P. officer entered the peaceful lobby of a respectable hotel, where a number of guests were scanning the pages of newspapers for the news of the day and a few others were occupying their leisure at a quiet and friendly game of Rummy. No money, or anything to represent money, or to show that gambling was being practised, was in sight; yet the officer ordered the men to "Stop That Game!" This is only another example of the petty actions of police that our people must tolerate.

The Coleman house gate did not stop two airplanes travelling between British Columbia and Montana on Tuesday morning.

REAR TEA 'is good tea'

The sealed package keeps it good

Co-Operative Wheat Pools

With the abolition of the Wheat Board created under the stress of war conditions for the marketing of the wheat crop of Canada, and the unacted state of world markets since then, the problem of marketing the wheat of this Dominion so as to bring an adequate return to the wheat growers has become more and more acute. Steps taken to revive the Wheat Board under peace conditions in 1932 and 1923 having ended in failure, despite all the efforts of the Western Provincial Governments, the farmers themselves are now engaged in the really formidable task of endeavoring to create co-operative pools to act as selling agents for all wheat consigned to them, the idea being that once these pools are successfully finished a joint selling organization will be set up to handle the export end of the business.

The first essential to the success of this new method of marketing is that at least one-half of all the wheat growers in each Province creating a pool shall by signed contract bind themselves to deliver all the wheat grown by them to the pool for a period of five years, and accept in payment therefor the average price realized in each selling season.

In a word, the proposal is that, instead of each farmer selling his wheat individually, fifty per cent. of them or more shall sell collectively. The small, pioneer farmer with only a few loads to sell, and the farmer having heavy liabilities to meet and who is therefore compelled to sell immediately his wheat is threatened, is to be placed as nearly as possible on a basis of equality insofar as marketing is concerned with the large and well established farmer shipping wheat by the carload and who, by reason of his established position and credit, can choose the time of selling as prevailing market prices may dictate as being the most advantageous time to sell.

Under the plan proposed, instead of an enormous volume of wheat being thrown on the market under pressure by a large number of farmers early in the season, thus forcing down the price, the wheat will pass through a co-operative pool and be handled by it so as not to "break" prices, and thus obtain the highest possible average price for all.

Whether this pooling arrangement will realize for the farmers all that is claimed for it is, of course, open to question. There are many who are skeptical, but unquestionably the vast majority of wheat growers, with the experience of the last few years fresh in their minds, are of the opinion that marketing conditions and price cannot be any worse than they have been, with the chances that they will be considerably improved under the pooling system.

There is, too, in some quarters objection to the binding nature of the contract stipulating that all wheat grown for a period of five years must be turned into the pool. However, those among the farmers most experienced in the business, and practically all the leaders in the farmers' movement and organizations are convinced after long study that a "contract" is an essential feature to success, and that a reasonable length of time is required to demonstrate the feasibility and success of the scheme. And inasmuch as those responsible for the management of the pool and the selling of the wheat must be in a position to make binding contracts with purchasers for given quantities of wheat, it stands to reason that, on their part, they must be protected by equally binding contracts for the delivery of wheat to them wherewith to fill such contracts. It is, therefore, a straight matter of business.

Under the proposed contract between the individual farmer and the pool, it is stipulated that the contract becomes binding and the pool becomes operative only in the event of at least fifty per cent. of the farmers signing up. And the signatures of this fifty per cent. must be obtained to contracts in the course of a few weeks if the pools in the various provinces are to become operative this year. There is, therefore, no time to be lost on the part of all farmers, business men, and others, who believe that this new method of marketing gives promise of success and a betterment to agricultural conditions throughout Western Canada.

Farmers are dissatisfied with present conditions, and no wonder. Business men are dissatisfied because if the farmers are not succeeding and prospering, business in this country cannot succeed and prosper. All are in the same boat. Thousands believe the proposed pooling arrangement offers a solution, and they will not be satisfied until it has at least been given a fair trial. It would seem, therefore, to be the part of wisdom for everybody to get back of the pool and put forth their best efforts, individually and collectively, to assist the Pool Committee to secure the necessary fifty per cent. signed contracts in good time to bring the pool into operation to handle the 1933 crop.

England, Ireland and U.S.

Mr. Winston Churchill, addressing a meeting of the English-American Union, said: "I was listening the other day to a very gifted young American, who said about the Irish question: 'England never remembered, Ireland never forgot, and America never knew.' Now they had revision that epigram." England had remembered, Ireland was beginning to forget, and America understood. "From the London Times.

Airplanes Carry Supplies to Surveyors

The Air Board and the geological survey were working hand in hand this summer in connection with the bringing in of supplies to surveying parties in Northern Canada. In the past it has been necessary to bring in supplies by pack or canoe, and portage from the end of the steel. Under the new arrangements, wherever possible, the airplanes of the board will transport the supplies.

Using Banff-Windermere Road

Since the opening of the Banff-Windermere road linking up the grand circle tour through the Canadian and American Rockies, there have been 1,089 cars over the road, according to a statement from the National Parks Department. Of this number nearly 500 were American. At the auto camp at Calgary 4,000 tourists have been accommodated since July 1st.

Fourteen Stone Axes, Recently Unearthed on a Farm Property in Norway, are Declared by Experts to be Examples of One of the Earliest Known Forms of Stone Axes, Dating from a Period 7,000 Years Ago.

The Important Part Patient—Where am I? Doctor—You have been injured in a trolley accident, but you will recover. Patient—How much?

"My Hands Trembled and I Could Not Sleep"

Mr. Thomas Honey, Brantford, Ont., writes—

"When I began taking Dr. Chase's Nerve Food, I was so nervous that when I picked up a cup of tea my hand would tremble like a leaf. I could not sleep well, could not remember things, and there were neuralgic pains through my body. After taking seven boxes of Dr. Chase's Nerve Food, however, I am in perfect health."

DR. CHASE'S NERVE FOOD

50 cents a box, all dealers or Dr. Chase, 1274 St. Paul, Toronto.

The Price of Progress

Problem of City Noises is Growing All the Time

Scientists have begun to enquire as to whether the concentration of electric wires in the cities has an influence upon the nervous system of the urban dweller. Certainly, the concentration of noises in the city has a big influence.

Every new development which brings something worth while into the lives of the people takes tribute of their peace of mind. The modern problem of city noises is a big one and is growing all the time. A crusade for more quiet is a pressing need of the times.

For Constipated Bowels

Smoothest Regulator Is Dr. Hamilton's Pills

No Headache, Biliuness, Sour Stomach When They Are Used

Fine for Constipation!

They cleanse the Liver and Move the Bowels While You Sleep

Don't stay sick or ailing! Use this grand family remedy at once. It will give you spirits, ambition, appetite, good blood, better nerves—in short, good health. You can get all this in a 25c box of Dr. Hamilton's Pills. Sold by all dealers in medicine.

B.C. Leads in Fisheries

Canada's sea fish catch in 1922 amounted in value to \$20,953,234, an increase of about \$1,500,000 over the previous year. British Columbia stands first among the provinces in the proportion of the value of its sea fish catch, with Nova Scotia a close second and New Brunswick, Quebec and Prince Edward Island following in order stated. The principal British Columbia catch last year was salmon, with a value of \$5,045,203. The halibut catch amounted to \$2,563,000.

DELICATE GIRLS NEED NEW BLOOD

Rich, Red Blood Means Health and Strength

The assemblage of young girls may be inherited, or it may be caused by bad air, unsuitable food, hasty and irregular eating, insufficient outdoor exercise and not enough rest and sleep.

It comes on gradually, beginning with languor, indisposition to mental or bodily exertion, irritability and a feeling of fatigue. Later comes the paleness of the face, headaches, dizziness following a stooping position, frequent backaches and breathlessness. In a majority of cases constipation is present. There may be no great loss of flesh, but usually the complexion takes on a greenish-yellow pallor.

Cases of this kind, if neglected, become more serious, but if taken in time there is no need to worry. Dr. Williams' Pink Pills, which are free from any harmful or habit-forming drug, are just the tonic needed to remedy this wretched state of health. Though it is not noticeable, improvement begins with the first dose. As the blood is made rich the complexion leaves the face, strength and activity gradually return and the danger of relapse is very slight.

If any symptom of anemia appears, prudence suggests that Dr. Williams' Pink Pills should be taken at once, and the sooner they are taken the more speedily will their action improve the blood. You can get these pills through any dealer in medicine, or by mail at 50 cents a box or six boxes for \$2.50. The Dr. Williams' Medicine Co., Brockville, Ont.

Plans World Trip

Portuguese Flyer Expects to Spent 280 Hours in Air

Col. Sacadura Cabral, one of the Portuguese aviators who flew from Lisbon to Rio de Janeiro, referring recently to his project of flying around the world, said his itinerary would be divided into three parts. The first would be from Lisbon to Japan, 5,970 miles; second, Japan to Newfoundland, 7,850 miles; third Newfoundland to Lagos by way of Fayal and Ponta Delgada, 2,410 miles.

On the basis of an average speed of seventy miles an hour the aviator would expect to spend 230 hours in the air.

Heat of Flowing Lava

How hot do you suppose flowing lava is? During the recent eruption of Mount Etna the men of science took steps to find out. They plunged electric thermometers into red-hot lava not far from the cracks in the mountain whence it issued, and got a reading of 1,174 degrees Fahrenheit. It is probably much hotter than that in the interior of the mountain.

What a grand old world this would be if opportunity knocked at a man's door as often as the bill collector!

Wholes suffer a great deal from rheumatism.

W. N. U. 1457

Soldiers Good Farmers

Very Satisfactory Report Issued By Soldier Settlement Board

The Soldier Settlement Board has compiled crop production reports on 18,216 soldier settlers' farm for the season of 1922. They show a total of 66,000 bushels of grain, 1,000 acres amounting to \$15,945,203.67, the principal items of which are:

Wheat, 7,591,018 bushels; oats, 6,407,721 bushels; barley, 1,243,556 bushels; rye, 215,812 bushels; flax, 107,052 bushels; fodder corn, 37,328 tons; turnips and mangolds, 28,239 tons; apples, 191,509 barrels. The average yield for wheat was 14.85 bushels; oats, 24.61 bushels; barley, 20.35 bushels.

The total area reported on was 2,420,000 acres, which, however, does not include one and a half million acres of soldier grant lands. Of the area reported on, 1,270,848 acres are under cultivation. An area amounting in all to 123,532 acres was broken by soldier settlers in 1922.

The census of livestock on the same farms included 77,594 horses, 212 mules, 52,717 milch cows, 83,949 other cattle, 13,172 brood sows, 32,375 other swine, 11,225 sheep, 307,981 chickens, 3,722 turkeys. The estimated total value of livestock is \$123,981,297. Settlers have an average of five horses, four milch cows, six other cattle and 55 chickens.

Eighty-one per cent. of the settlers had a farm garden, 79 per cent. had milch cows, 48 per cent. brood sows, and 77 per cent. poultry.

Bank Failures

Old Country Paper Says Banking System in Canada is Sound

The London Times says the suspension of payments by the Home Bank of Canada is an indication of the difficulties that beset the banking business in the Dominion in recent years. Such an announcement as the suspension of the Home Bank, however, is not surprising, the Times continues, when the conditions which have prevailed in Canada during the last nine years are considered.

"Thanks to the admirable banking system obtaining in Canada," says the Times, "the troubles there have been restricted and confined in area and it is evident that the leading banks in the Dominion will come through the trial in a thoroughly successful manner. Banking is subject to conditions that apply to ordinary businesses, and to push it beyond its natural limitations is only to court danger."

"Fortunately the Canadian banks as a body have steadfastly opposed an expansionist policy and the minor banks have been experienced only to tend to show that the hazards undertaken by a banker are considerable, even when his hands are unfettered."

Promotions in Ottawa

Mr. Coolican Now General Superintendent of Postal Services

E. J. Lemaire, of Ottawa, formerly private secretary to the late Sir Wilfrid Laurier, has been appointed Clerk of the Privy Council to fill the vacancy caused by the recent death of Rodolphe Bouchard. The position carries with it the rank of deputy minister. To fill the position of Deputy Postmaster General of Canada in succession to Dr. R. M. Coulter who retired some time ago, L. J. Gadsby, Divisional Superintendent of Postal Services for Eastern Canada, has been named. P. T. Coolican, Divisional Superintendent of Postal Services for Western Canada becomes General Superintendent of Postal Services for Canada.

Too Good to Last

French Business Man's Idea to Get Cheap Help

Stenographers at five sous, or one cent a half, a day, have been found by an ingenious business man, who, however, must now tell his story to a judge.

In advertising for typists, in which he promised excellent wages, each girl who was told to come on one day at the office and show her skill. The girl gladly complied, put forth her best efforts and departed with the understanding she would be advised of the result of her work next day. The next day, however, she came on one day at the office and showed her skill. The girl gladly complied, put forth her best efforts and departed with the understanding she would be advised of the result of her work next day.

Mines Being Re-opened

There is a revival of the mining industry in the Lake of the Woods district, Ontario, just east of the Manitoba boundary. A number of old workings are being re-opened, and there are hopes that there will be a resumption of real mining on a permanent basis.

Elementary education in England, it is estimated, will cost \$105,000,000 during this year.

Gasoline From Coal

Henry Ford Conducting Interesting Experiment at Detroit

A method of burning coal twice, and thus materially reducing the cost of automobile manufacturing, has been suggested by a firm of New York chemists, and taken over by Henry Ford, according to Emil Piron, who, with his associate, V. Z. Caracrist, conducted the experiments. "The method is practicable and is a success beyond all doubt," said Piron. Mr. Ford is now engaged in constructing buildings at Detroit, where the new process will be put into operation.

One of the principal by-products will be gasoline, which can be produced at an estimated cost of six cents a gallon. This sort of motor fuel is likely to be brought into easy reach of nearly everybody in the country, if the new process proves workable when it is actually put into operation on a commercial basis.

Each ton of coal burned by Ford under this process will produce coke—with which he can make his own steel instead of buying it as at present—motor gasoline, lubricating oil, fertilizer, creosote, gas and grease. Diron said in other words as each "diver" goes through the factory, its gasoline, oil and grease will be manufactured as a side line at hitherto unheard-of prices.

Miller's Worm Powders were devised to promptly relieve children who suffer from the ravages of worms. It is a simple preparation to destroy stomachic and intestinal worms without shock or injury to the most sensitive system. They act thoroughly and painlessly, and though in some cases they may cause vomiting, that is an indication of their powerful action and not of any irritating property.

Show Animals Become Scarce

High Prices Are Being Obtained For Wild Beasts

Wild animals cost a good deal of money at the present time. A giraffe brought about \$5,000; hippopotamuses from \$2,500 to \$5,000, and good lions were worth \$1,500 each. The principal reason for this scarcity, Post-war conditions have interfered with the pursuit of the industry of providing wild beasts, the European centre of which is at Hamburg.

John Hagenbach has applied to the British authorities for permission to send a party of German animal catchers to India, and hopes to head the expedition personally. In India he will visit his old friend the Maharajah of Gwalior, from whose reserves Mr. Hagenbach, in previous years, has obtained many tigers. It was the Indian dignitary's chief grief that he had no lions. Mr. Hagenbach sent him eight of the kings of the animal world. The lions increased so rapidly in the tigers' forests that they became the terror of the entire country and caused the Maharajah much litigation and annoyance.

The most obstinate corn fall to resist Halloway's Corn Remover. Try it.

Taking Over Russian Lands

German Organization is Establishing Experimental Farm Near Moscow

Another agricultural concession has been taken in Russia by a German organization called the German-Russian Food Growing Company, which will establish an experimental farm on a tract of about 30,000 acres near Moscow. This is similar to the Krupp agricultural concession in the Ukraine. Other German interests in Russia will take over wood concessions covering 200,000 acres of forest near Mys Rybnik. Sawmills will be erected and cellulose factories operated.

Appoint "Radio Cops"

"Radio Cops" have now been appointed by the radio telegraphic branch of the Department of Marine and Fisheries for some 22 districts throughout the Dominion, scattered all the way from North Sydney to Vancouver. It is hoped in the near future to make appointments at Sarnia, Sault Ste. Marie, Regina, Edmonton and Lethbridge.

"Seems to me," said the ladder, "I'm always up against it."

RED RASH ON HANDS AND BODY

Itching and Burning Terrible. Cuticura Heals.

"I was troubled with eczema on my hands and body. It broke out in red rash and later formed sore eruptions containing water. The itching and burning were terrible. My hands had to be bandaged, and my clothing aggravated the breaking out on my body. The trouble lasted about three months."

"A friend advised me to try Cuticura Soap and Ointment. I did and found they helped me, and after using two cases of Cuticura Soap and two boxes of Ointment I was healed." (Signed) Mrs. Russell Hendabee, Sand Point, Nova Scotia.

Cuticura Soap, Ointment and Tablets are sold by all druggists. Write for free booklet and sample of Cuticura Soap and Ointment. Address: Cuticura Soap and Ointment Co., P.O. Box 100, Portland, Maine, U.S.A.

Senate Reform

Toronto Paper Would Like to See the West Put Forth a Definite Plan

The system we have is a poor one from every point of view, except that of the parties who get a constituency conferred on him by the leader of his party. The man who gets the job is provided for, he has powers, privileges and perquisites, he has a nice salary for life. He can help make laws and help prevent the making of them, and the people of Canada have no control over him.

It has long been the contention of The Star that a second chamber is unnecessary and that it should not be reformed, but abolished. Fault is found with the present chamber that it is useless at best and mischievous at worst. If you reform it, change it, strengthen it, or try to take from the House of Commons some part of its effectiveness in order to put life into the second chamber. It has seemed to us that a senate that is useless is a senate at its very best. But so many people are wedded to the idea that a second chamber must be maintained or the sky would fall, and as the senate persists in its failure to rest content with merely being useless, we would like to see the west put forward a definite plan of senate reform. People throughout Canada would, we feel sure, be keen to discuss it.—From the Toronto Star.

Relief from Asthma. Who can describe the complete relief from suffering which follows the use of Dr. J. D. Kellogg's Asthma Remedy? Who can express the feeling of joy that comes when his soft and gentle influence reaches the lungs? It has made asthmatic affliction a thing of the past for thousands. It has made the God of doctors everywhere have said it for years.

New Financial Record

A new financial record was established by Canadian houses in absorbing immediately a bond issue of \$25,000,000 for additional equipment on the Canadian National Railways. The bonds carry 5 per cent. interest and run for fifteen years. None of the money was raised from outside sources.

One Way to Pay Debt

Italy has accepted Germany's proposal to pay her debt of four million gold marks in literary and scientific works, and in forwarding the German Government with a complete list of the "degraded" of Italian libraries and public collections.

Using wireless amplifiers and a loud speaker, to magnify the sound of heart beats is surgery's latest development.

TRY IT!

Hundreds have found relief for Aches, Pains, Bruises and Cuts in Minutes.

MINARDS LIMENT

Always have Mustard on the table

It's not just custom that makes people take mustard with their meals. Mustard aids digestion and helps to assimilate food. It is a good habit to take the mustard. It is a good habit to take the mustard. It is a good habit to take the mustard.

but it must be Keen's

Financial Situation Now Facing Germany Regarded As Desperate

Berlin.—The financial and political situation facing the new German Government must be regarded as well nigh desperate. Dr. Rudolf Hilferding, Minister of Finance, declared in addressing the Budget Committee of the Reichstag.

Not only is the Federal Government required to cover its own deficit, he said, but also the deficits of all the federal states and many of the companies; otherwise the whole administration of the country would break down. He criticized the Reichsbank for attempting to support the falling mark with insufficient means, and complained that private firms were issuing emergency currency without the consent of the Reichsbank.

The payments in execution of the peace treaty increased from 450,000,000 marks in January to 3,000,000,000 in July. Dr. Hilferding asserted, and there would be considerably increased in the present month. The deficit in the operation of the state railways alone, he added, amounted to 450 billion marks.

He concluded by declaring it impossible to balance the budget even with the proposed heavy increase in taxation.

World's Largest Plane

Trial Flight of Huge Bombing Machine Successfully Carried Out

Dayton, Ohio.—Surpassing even the wildest dreams of its designer and other United States air service officials, the Bunting bomber, said to be the world's largest plane, completed its maiden flight at Wilbur Wright field.

The ease with which the giant dreadnought of the air was manoeuvred, both on the ground and in flight, and the slow take-off and landing speeds were the chief feature of the performance. The plane was in the air 23 minutes.

The machine was designed by Walter Bunting, an Englishman. The plane carries seven machine guns and bombs totalling in weight 12,000 pounds. Regular operation plans call for a crew of six men.

Collins' Memory Honored

Military Parade in Dublin Nearly Ten Miles Long

Dublin.—The anniversary of the death of Michael Collins was observed with military displays in Dublin, Cork, Waterford and other cities. The parade in Dublin was the greatest military spectacle ever seen here. All branches of the service were represented in a line extending nearly 10 miles.

When the head of the procession passed the cenotaph, Miss Kitty Kiernan, to whom the late leader was betrothed, placed a wreath on the tomb.

Renew Jap-U.S. Pact

Washington.—The treaty of arbitration between the United States and Japan which had expired by limitation, has been renewed for a period of five years without change.

Wheat Pool In Saskatchewan Will Have Wide Powers

Regina.—Wider powers than are covered in the contract are provided for the Saskatchewan wheat pool in the memorandum of association which was approved by the wheat pool committee after an entire evening had been spent discussing the various features contained in the draft document.

The memorandum of association provides for a capitalization of \$100,000, divided into 100,000 shares of one dollar each, and the registered office of the company is to be located in Regina.

Among other things the memorandum of association gives the pool power to manufacture, buy, and sell flour and other food products manufactured from grain and cereals; power to acquire or build elevators, mills, warehouses, factories, plants, offices and houses and to purchase, build, hire or charter steamships and other vessels. The memorandum also contains provisions empowering the pool to borrow and invest money and to take over other companies or enter into agreements with other companies.

A clause is included giving the pool

To Modify Climate Of Eastern Canada

Fifteen-Mile Dam Across Belle Isle Straits Urged

Ottawa.—Dimitrie Joanowicz, a Rumanian engineer, has arrived in Ottawa for the purpose of presenting to the Minister of Marine and Fisheries a scheme to modify weather condition in Eastern Canada and keep the St. Lawrence River open for navigation during the winter by building a dam across the Straits of Belle Isle. He has already discussed his project with officials of the department and will place his plans and theories before the minister.

Joanowicz proposes that Newfoundland and Canada should join in the work, which would consist of a dam 15 miles long and three-quarters of a mile wide at the base, which would block the Straits of Belle Isle and prevent the ice floes and cold currents from entering the gulf. Inward and outward navigation would be permitted through two locks. In discussing the project, the Rumanian engineer dilates upon the effects exercised by tide, ice and cold currents upon the climate and upon navigation.

Soviets Claim Wrangle

Russians Protest to London Over Canada Raising British Flag On Island

Moscow.—Foreign Minister Tchicherin has sent a note to the British Government protesting against the raising of the British flag on Wrangel Island by Vilhjalmar Stefansson, the Canadian explorer.

Wrangel Island was incorporated into Russian territory in the year 1921-22, the note says. In 1904 Russia built lighthouses on the island and undertook other works there, and in 1915 formally notified the allied and neutral governments that Wrangel, together with the other islands and territories along the coast of Siberia, constituted integral parts of Russian territory.

As during the entire intervening period, no government has questioned Russia's claim to the island, the note says, the Soviet Government regards the raising of the British flag there as a violation of Russia's sovereign rights.

Cattle Will Be Tattooed

Branding Discontinued on Canadian Cattle for British Market

London.—Canadian cattle coming to this country may be tattooed instead of branded, according to a statement issued by the Ministry of Agriculture here. The tattoos may be on the left ear of an animal in the form of a capital letter "C." This operation, it is stated, is a simple one and practically painless.

The substitution of the tattooing for the branding method for the identification of imported Canadian cattle is due to the protest made by the Canadian Society for the Prevention of Cruelty to Animals.

France Refuses To Evacuate Ruhr Valley

No Change in Position Until Germany Pays Reparations

Paris.—Germany can obtain evacuation of the Ruhr only by paying reparations, she can secure attenuation of the rigors of the occupation by ceasing passive resistance and she can win no reduction in the amounts she owes France unless the allied creditors of France see fit to give France credit for equal amounts on her war debts.

These are the conclusions of Premier Poincaré's reply to Marquis Curzon's reparations note of recent date. The French Government also expresses its belief that the Allies can agree on methods of bringing about the execution of the treaty by continuing courteous negotiations.

The British proposal for a re-estimate of Germany's capacity for payment, and Lord Curzon's suggestion that the question of the legality of the occupation of the Ruhr be referred to the Hague are rejected and the French position is reaffirmed as remaining unchanged.

As for the inter-alied war debts, France holds that a settlement of this question should wait upon final payment by Germany of fifty billion gold marks in reparations comprised in the A and B bonds.

Terminal Elevators Want Rates Raised

Request of Operators at Lake Head Will Be Considered

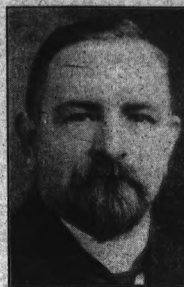

Winnipeg.—An increase of one-half cent per 100 pounds on the elevator charges on mixed grains was asked for by the terminal elevator operators at the head of the lakes when their representatives appeared before a session of the Board of Grain Commissioners here.

Handling charges on mixed grains, receiving, elevating, storing, spouting and insurance against fire for the first 15 days is at present two cents a 100 pounds. Leslie Boyd, K.C., chairman, said the board would consider the application. There were no representations made with regard to other elevator charges.

Five Millions For Charity
Bucharest.—A bequest of 1,000,000,000 lei (about \$5,000,000) left by Jacques Elias, a Jewish millionaire, for Rumanian cultural and charitable purposes, has been formally handed over to the Rumanian Academy, and the distribution of the fund will be started in October. None of the heirs appeared against the will.

Across Continent In 34 Hours
San Francisco.—San Francisco moved nearly four days' travel nearer to New York through the success of the air mail service's first test of night flying, westbound. Pilot C. K. Vance brought more than 400 pounds of mail from eastern points here, 24 hours and 23 minutes after the first batch of it had left Long Island.

Ship Butter Via Panama

Several Thousand Boxes of Alberta and Saskatchewan Product Going to Britain

Vancouver.—A trial shipment of several thousand boxes of Alberta and Saskatchewan butter will be exported to the United Kingdom in a few days by way of British Columbia and the Panama Canal.

Arrangements for the shipment were completed by F. P. Laitone, General Manager of the Central Creameries, and President of the Alberta Dairy Farmers and Manufacturers' Association. The rate to Liverpool, via the Panama Canal, has been cut in half, from \$2 to \$1.50 a hundred, this rate making the cost per hundred pounds via the canal \$1.77 cheaper than by the Montreal route, it is stated.

If the trial shipment is successful it is expected the transportation of dairy produce from the prairies through British Columbia will develop into large proportions.

Canadian Dairymen Need Better Methods

Have Keen Competition in New Zealand and Australia

Ottawa.—A strong warning to Canadian dairymen of the need of better methods to meet the competition of New Zealand and Australian cheese and butter is given by J. A. Riddick, Dairy and Cold Storage Commissioner of the Dominion, in a bulletin just issued by him as a result of his recent visit to the Antipodes to study the dairy industry there.

Geddes Will Return, If Possible
London.—The secretary of Sir Auckland Geddes, British Ambassador to the United States, who has been in England for two months, stated that Sir Auckland fully intended to return to his post at Washington unless the state of his health prevents.

Wool Scrap Warnships

Tokio.—Official announcement was made that the scrapping of warships in accordance with the Washington treaty, ratification of which has just been exchanged by the signatory powers, would be carried out immediately.

Protest Against Report That British Harvesters Were Left Stranded

Reparations Problem

British Government in No Mood to Brook Further Delay

London.—London in August is comparatively dead, politically and diplomatically. Hence it is difficult to gather any official opinion on the last note of M. Poincaré, the French Premier, with regard to the German situation. A point much discussed in London is whether the note will lead to another allied conference in Paris or elsewhere, in an endeavor finally to settle the reparations problem.

The general view here is that this was one of the principal objects M. Poincaré was aiming at in his latest exposition of France's policy, but in this connection it was pointed out that Premier Baldwin, in recent statements in Parliament and elsewhere, made the assertion that the British Government was not in a mood for much further delay in settling the issue.

Telegraph Slower Than Mail

Depreciation in Mark Increased Business on German Lines

Berlin.—Telegraphic communications in Germany have been swamped ever since the mark began its downward swoop. Since January of this year the amount of business handled by the German telegraphic lines has been double that of the corresponding period of last year.

Telegrams now travel more slowly in Germany than letters, and the telegraphic administration has appealed to the public to economize its business and use the wires as sparingly as possible.

Wounded Messenger Recovering

Toronto.—David Campbell, the Sterling Bank messenger, who was shot through the body by the bandits who robbed messengers of \$83,000 here on July 24, has recovered sufficiently to leave the hospital. The condition of the messengers, Duck and Harris, still remains unchanged.

Arab University in Jerusalem

Jerusalem.—An Arab university will be founded in Jerusalem. The patriarch Basilianna is heading the movement for the establishment of the school, which will use both English and Arab tongues for instruction. Preparatory classes are announced to begin this year.

Will Scrap Warships

Tokio.—Official announcement was made that the scrapping of warships in accordance with the Washington treaty, ratification of which has just been exchanged by the signatory powers, would be carried out immediately.

Winnipeg.—An indignant protest against the published reports that British harvesters were being left stranded and jobs in Western Canada was voiced here by Major L. F. Howard, Superintendent of Immigration in Western Canada, who said he considered the reports that British harvesters had been "lured" to Canada under false pretences and left jobless, and liable to do incalculable harm, as "such reports" would not do but be reproduced in British papers and would be a "black eye for Canada."

"The reports are liable to interfere seriously with the regular immigration to this country and render it impossible to secure harvest help from Great Britain should their services be required again," Major Howard told the Canadian Press.

"Probably there were a few British harvesters stranded temporarily—just as there have been some stranded here—but they are at work now. If they want to be," declared William Carnill, Superintendent of the Calgary Labor Office, and in charge of Alberta harvest employment here, who, along with the Saskatchewan representative, said reports that the men were stranded and without jobs were without foundation. According to the Alberta and Saskatchewan officials, 8,000 men still are needed. They declared jobs are waiting for them, regardless of previous experience and after careful consideration except their ability to stand the test of hard work.

"As for experience being requisite to a job, I don't believe it," said Mr. Carnill. Thousands of men take on the harvest for the first time every year, and thousands of them make good at it. Of course, there are failures in every lot."

Sir George Foster Is Making Western Tour

Speaking in Support of Canadian Union of League of Nations

Port Arthur, Ont.—The success of the League of Nations, after all, depends upon the people themselves," declared Sir George Foster, who arrived in the city en route to Winnipeg and other western cities, where he is to spend the summer of the Canadian Union of the League of Nations. It is the desire of Sir George to formulate unions in the various large centers of the west, to work in conjunction with the Canadian body for the purpose of instilling in the public various measures of interest to Canadians. Sir George will go as far as Vancouver.

Turkey Will Ratify Lausanne Treaty

Grand National Assembly at Ankara Is Discussing Terms

Constantinople.—Debate on ratification of the Lausanne peace treaty is proceeding in the Turkish Grand National Assembly at Ankara, and while the end of the discussion is not in sight, ratification of the pact is regarded as certain.

In favoring endorsement of the work of the negotiators at Lausanne, Yusuf Kemal Bey, President of the commission of foreign affairs, referred to the treaty as a document of life for Turkey. He declared it was entirely due to the works of Mustafa Kemal Pasha.

Artists Demand Daily Pay

Fluctuation in Exchange Makes Big Difference in Salary

London.—Singers and actors in the countries affected by the slump in exchange have adopted a new method of collecting their salaries. The artists now demand that they be paid at the conclusion of each day's work, and at the rate of exchange paid for each day's work.

The artists have refused to sign contracts except on this basis, as they claim that the fluctuation of the exchange makes their salary practically nothing at the end of the month.

Want Money First

London.—Sheffield and Birmingham manufacturers have declined to accept large orders from the Russian Government for engineering tools to be used in conjunction with forestry under the terms of the Lend-Lease agreement, until the goods are dispatched. Several previous contracts were made on a cash basis.

Floating Palace on the St. Lawrence

During the past the Canadian Steamship Lines has always been the pioneers in placing at the disposal of the public palatial river steamers, which have provided passengers with all the comforts that it was possible to obtain aboard ship. The introduction of the S.S. Richelieu into the service, however, has outclassed any previous effort on the part of the company in this direction. The S.S. Richelieu is well named. It was a great, honored and proud name in the history of France, and the company is

more perpetuating its greatness in the river steamer which bears Cardinal Richelieu's name. The vessel is not only great, but palatial, and its magnificence reflects credit on its builders, especially when considering that it is the work of Canadians. It is undoubtedly the last word in de luxe construction, and was built at Lunenburg by the T. & M. Shipbuilding Co. The Richelieu is constructed along lines for the comfort of its passengers, inasmuch as the amusement and social rooms are entirely separate from

the sleeping accommodation, so that the early retiring birds may secure rest without fear of being disturbed by the joviality of their fellow travellers. Oil burner engines have been introduced, which is another step in the direction of advancement, and insures a maximum of cleanliness. Her dimensions are: Length over all, 252 feet; beam over guards, 56 feet; moulded depth, 21 ft. 6 in. She is equipped with six Scotch cylinder triple expansion type and develop 4,500 horsepower.

\$2,000 IN PRIZES Don't Miss the Big Day in The Pass

PROGRAM OF GOLF TOURNAMENT HERE

September 1st, Morning

1. 18 holes medal play, gentlemen. Best 16 scores (gross) to qualify in two flights. Special prize for best handicap score, presented by G. A. Vissac, Esq., President of Blairmore Golf Club.

2. 9 holes medal play, ladies. Best 8 scores (gross) to qualify. Special prize for best handicap score, presented by Crows' Nest Pass Golf Association.

September 1st, Afternoon

1. Mixed foursomes (handicap) 9 holes. Prizes for winners presented by Dr. J. Olivier.

September 1st, Evening
Dance in Greenhill Grill in honor of visiting golfers.

September 2nd, Morning

1. 18 holes, gentlemen, hole tournament. 1st flight.

2. 18 holes, gentlemen, hole tournament. 2nd flight.

3. 9 holes, ladies, hole tournament.

4. 18 holes medal play, gentlemen, handicap. Two prizes presented by Pincher Creek Golf Club.

5. 9 holes medal play, ladies, handicap. Two prizes presented by Pincher Creek Golf Club.

September 2nd, Afternoon

1. 18 holes, gentlemen, hole tournament. 2nd round, 1st flight.

2. 18 holes, gentlemen, hole tournament. 2nd round, 2nd flight.

3. 9 holes, gentlemen's foursome, handicap. Prizes presented by West Keith, Ltd., and Canadian Explosives, Limited.

5. 9 holes, ladies foursome, handicap. Prizes presented by Crows' Nest Golf Association.

September 3rd, Morning

1. 18 holes, gentlemen, hole tournament. Final round.

2. 18 holes, gentlemen, hole tournament. Final round.

3. 18 holes, ladies, hole tournament. Final round.

ment. Final round.

4. 18 holes medal play, gentlemen, handicap. Prizes presented by Riverside-Irons Works, Ltd., Blairmore.

5. 9 holes medal play, ladies, handicap. Prizes presented by Crows' Nest Pass Golf Association.

(Note—Nos. 4 and 5 may be played for also on the afternoon of the 3rd as may be arranged by the committee of the Association.)

It will be observed that most of the competitions will be played under handicap conditions and all players will therefore have an equal chance.

All entries from Blairmore Club members should be in the hands of the secretary of the Association, A. J. Kelly, by Friday noon.

Members of the Blairmore Club may bring friends to the dance on Saturday evening.

AND HOW'S THIS?

You sing a little song or two,
And have a little chat;
You make a little candy fudge,
And then you take your hat;
You hold her hand and say Goodnight
As sweetly as you can.
Now ain't that a helluva evening,
For a great big hunky man?

Mr. and Mrs. William Thibodeau, accompanied by Miss Jeannette Thibodeau, arrived last week end from Missoula, Montana. They were accompanied on the motor trip by Jack Boyce, an old timer of this district. The party returned to Missoula on Tuesday.

Joe Lombardi, charged with speeding, was found not guilty before Magistrate Gresham yesterday afternoon. Lombardi was represented by Mr. J.W. McDonald, K.C., of Macleod.

Several collisions of a minor nature have occurred on the Slide road during the week.

The big game season—sheep and goat—opens on Saturday, September 1st.

In the days before motor cars the bull was considered the most dangerous thing with horns.

H. H. Tate and family left here on Thursday night last for their home in Kenora, Ontario.

A very successful whist drive was staged on Monday night by the local Order of Eastern Star.

Mrs. J. M. Windsor and children, who have been spending a vacation in Blairmore, will return to Calgary the early part of next week.

The schools of The Pass all opened for the fall term on Monday morning, with considerably enlarged enrollments.

The labor shortage has become so acute that you seldom see more than a dozen idle men watching a sign painter.

It has been estimated that there is now in India more than \$2,500,000,000 in gold, representing an accumulation of 7000 years.

The Grade VIII. results for the province show about 2400 successful candidates out of the 6000 who wrote the examinations.

The accident of Monday afternoon should act as a warning to children who are in the habit of following moving vehicles.

Fathers O'Reilly and Rouleau were up from Macleod last week end on a visit to Father McCormick at Coleman.

It's something like twenty-three miles from Blairmore, Alberta, to Michel, British Columbia, and parties have been known to go there and back in one night.

FREIGHT RATES

The appeal of Alberta and British Columbia, in connection with the differential in freight rates in the mountain territory, which was taken against the decision of the Railway Commission last year, in which 50 per cent of the differential was removed, was heard recently by the Dominion cabinet.

The appeal was argued for the provinces of British Columbia and Alberta by G. G. McGeer, K.C., of Vancouver, supported by Frank Ford, K.C., of Edmonton, and A. Chard, freight traffic supervisor for the Alberta government. An attentive hearing was given the appeal, which was very ably presented by the counsel. In addition to the request for the removal of all the mountain differential, Alberta supplemented the appeal by a request that the transcontinental rates to and from Eastern Canada and the United States be not higher than those applying from British Columbia to and from these points, but the defence argued that this question had not been dealt with by the Railway Commission and therefore could not properly be before the Dominion cabinet. The rates in question are lower to the coast than to Alberta points, defended by the railway companies as being compelled by water competition through the Panama Canal and American railway competition.

Lethbridge schools reopened on Wednesday of this week.

Mr. W. Abercrombie paid a visit to his home in Calgary last week end.

This week the new international highway between Nelson and Spokane was officially opened to traffic.

Magistrate Gresham moved into his new quarters at the court house this week.

Up in Drumheller, where there is almost as much business doing in "moonshine" as any other commodity, they have a police officer named Light.

The death is announced of Father Constant Chuanavel, who claimed he was the oldest Catholic priest in the world. Seventy-one of his years in the priesthood were spent in Ceylon.

Official announcement has been made of the appointment of Neville Chamberlain as chancellor of the exchequer and Sir William Joyce-Hicks as minister of health in England.

Lawrence Murphy and family, of Medicine Hat, were guests over the week end with the former's cousin, Mike Murphy, and family, at Frank. They are spending a few days in camp at Crows' Nest Lake before returning.

The Great West Amusement Company has come and gone and there many folks little the sadder and in a way wiser. It is regrettable that such a brand of entertainment should be permitted to camp within the bounds of a respectable community.

Drumheller's tax rate for this year is as follows: Municipal 36 mills, school 37 mills, hospital 3 mills, public library 1 mill, supplementary revenue tax 1 mill; total 78 mills, being an advance of two mills over last year. Blairmore's mill rate for all purposes is 41.

The Moderationists state that many people who had formerly voted on the dry side in the former plebiscites are now active workers for Moderation, as a result of what happened under prohibition in Alberta during the past few years.

The inauguration of the wheat pool has diverted the attention for the time being from the plebiscite to be taken on November 5th, on the liquor question, but both the Moderation League and the Prohibitionists are perfecting arrangements for their campaigns.

All records for a flight across the continent were broken on Friday last, when Pilot Wesley L. Smith, of the air mail service, landed in New York from San Francisco after a relay flight of twenty-six hours and fourteen minutes.

J. C. LeMotte returned from his vacation last week. Coming down on the train Friday evening he is reported in a fit of absentmindedness to have left the train at Sandstone. He says he meant to get off there. Anyway he didn't get here till Saturday. The walking is pretty good now anyway—Okotoks Review.

D. B. Dowling, head of the Dominion topographical survey department, and his brother, A. P. Dowling, spent the week end in town. While here they were joined by Mr. Collins, who is to succeed Mr. Dowling in his work, the latter retiring from active service. Messrs. Dowling motored over the new Banff-Windermere highway and report good roads all around, with the exception of a section between Fort Steele and Elko and east from Crows' Nest. They left the early part of the week and hope to continue to Ottawa.
